'Alarming' rate of overdoses in Sacramento area

(CNN) Health and law enforcement officials think counterfeit pain pills are the source of a spike in overdose deaths in the Sacramento, California, area. Forty-two people have been treated for overdoses and 10 have died since March 23, according to the DEA's San Francisco division. "The overdoses are occurring at an alarming rate," the DEA said. The agency thinks contaminated drugs are responsible. On Tuesday it opened an anonymous tip line. Anyone with information is asked to call 530-722-7577. Health officials believe the cases are linked to Norco pills sold on the street. Norco is a pain medication containing hydrocodone and acetaminophen. However, lab tests on some of the pills in question found they did not contain hydrocodone or acetaminophen. "The lab was able to identify the pills as containing fentanyl instead. This indicates that they are really fentanyl pills (street drugs - counterfeit) that have been made to look like Norco," said the Sacramento County Department of Health and Human Services. Fentanyl can be lethal. It is 25 to 50 times more potent than heroin and 50 to 100 times more potent than morphine, according to the DEA. An overdose of fentanyl can sometimes be reversed with a drug called naloxone, also known as Narcan. Symptoms of an overdose include trouble breathing, blue skin, vomiting, loss of consciousness and pupils that are the size of a pinpoint. Officials are reminding residents to use only prescription drugs that have been prescribed for them and to only take pills that have come from a reputable pharmacy.

International News – Significant Events

South Korea: North has mid-range nuclear capability

(CNN) South Korea believes its neighbor to the north may be able to mount a nuclear warhead onto a medium-range missile. In a background briefing with foreign reporters Tuesday, a government official said it appears North Korea has succeeded in miniaturizing a warhead enough to be mounted onto a Rodong missile. The official -- who remains unnamed as per South Korean government protocol -- says this ballistic missile can deliver a one ton (907 kg) warhead a distance of 2,000 km (1243 miles), putting U.S. military bases in South Korea and Japan within range. The official said: "We believe they have the ability to mount a nuclear warhead on a Rodong. Whether they will fire it like that is a political decision." However, the official added they have no evidence to prove this capability, an assessment backed up by the United States. "We know that they've said they have that capability and we have to take them at their word," Pentagon Spokesman Captain Jeff Davis told reporters Tuesday. "But we have not seen them demonstrate it." Kim Jong Un claimed last month his country had successfully miniaturized a nuclear weapon, as state run media published photos of him next to what it said was the miniaturized warhead. The briefing came as Washington D.C.-based monitoring project 38 North said that it had logged "suspicious activity" at the North's Yongbyon nuclear facility. Pyongyang carried out its fourth nuclear test on January 6th and has insisted its nuclear program will continue despite further U.N. sanctions passed against the country last month. The South Korean government official said the focus now should be on implementing these sanctions, adding there may be a level of chaos in the country when the cash starts to dry up but "at this point the leadership of Kim Jong Un is seemingly unshakeable." Meanwhile, Seoul says recent GPS disruptions carried out by the North ended Tuesday afternoon. The Ministry of Science, ICT and Future Planning says they traced the jamming to five different areas in North Korea originating on March 31. The ministry says 962 airplanes, 692 ships and 1,785 communication network base stations were affected but no damage reported. North Korea has not responded to the South's accusation.

SITUATION SUMMARY

Sacred Incident, Vegetation Fire, Sierra County

Location: Sierra City within the Sierra Buttes

Responsibility: FRA

Start Time: 04/05/16 at 1349

- 30 acres with potential for 50, 5% Contained
- Threat to Sierra City Water Treatment Plant

Weather of Concern

Northern California

- Record or near record heat is forecast for today with highs into the 80s and lower 90s throughout portions of Northern California.
- This early season heat event will likely impact heat sensitive groups.

Southern California

- Warm temperatures will continue through today for portions of Southern California.
- A system from the south will usher in light to moderate precipitation beginning Thursday.
- Shower activity will become more scattered in nature Friday into early Saturday, before another round of moderate to locally heavy showers arrives sometime late Saturday into Sunday.

Cal EOC Incident – 2014 Drought

SOC / Inland REOC remains activated in support of 2014 Drought

Weather

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Medford Weather:

A strong warming trend with record high temperatures will occur today and Thursday with a few high clouds as the only exception to sunny skies. A coastal thermal trough will move inland on Thursday and result in a return of cooler onshore flow at the coast while temperatures peak inland.

Eureka Weather:

A building ridge will bring above normal temperatures and dry conditions to the region through Thursday. Chances for showers will increase late in the week especially across the interior mountains.

Reno Weather:

Warm and dry weather will continue into Thursday, with afternoon highs near 80 degrees in the lower elevations. A change to a cooler and wetter pattern is likely late Friday and through this weekend as low pressure moves across California and Nevada. Additional storm systems may keep chances for precipitation going into next week.

San Francisco Weather:

A robust warming trend remains on track for today with potentially record breaking temperatures possible. Temperatures are expected to cool off on Thursday as onshore flow returns and a southerly stratus surge rushes northward up the coast. Chances for showers then return by Friday and persist into the weekend as a series of storm systems impact the region.

Sacramento Weather:

Warm and dry weather continues today, increasing chances of convective precipitation beginning Thursday night and through the weekend.

Weather

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Hanford Weather:

Much above normal temperatures will continue across Central California through Thursday with possible record breaking today. Otherwise unsettled weather will impact the region Thursday night through the weekend with increased potential for showers and thunderstorms across our area by the end of the week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Well above normal temperatures will continue into Wednesday due to high pressure and offshore flow. A couple of low pressure systems will bring cooler weather and a chance of rain to most of the area for the end of the week and the weekend. The active weather pattern may continue into early next week.

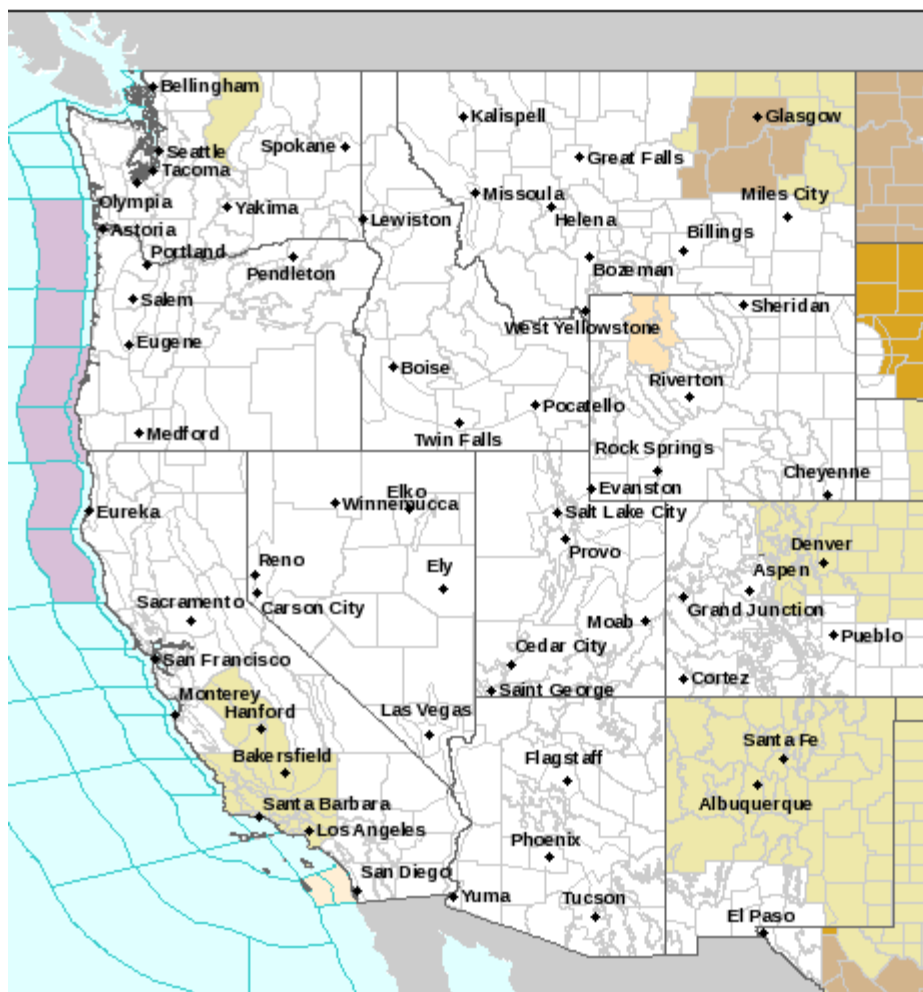

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Coastal fog, thin high clouds, and areas of strong offshore winds will start our day. High pressure aloft will bring us a very warm day today. The winds will decrease during the day. A low pressure system to our southwest will bring more clouds and some showers Thursday and Friday. Another low pressure trough will bring a better chance of showers and colder weather over the weekend. The unsettled weather pattern will continue next week with periods of showers.

Southeast California Weather:

The warmest temperatures so far this year will peak today with lower elevation communities seeing highs well into the 90s. An unsettled weather pattern will return to the desert southwest Thursday and continue for periods into next week yielding cooler conditions along with decent chances for rainfall.

STATE WEATHER MAP

- High Wind Warning
- Red Flag Warning
- Small Craft Advisory For Hazardous Seas
- Small Craft Advisory For Rough Bar
- Small Craft Advisory For Winds
- Small Craft Advisory
- Hazardous Seas Warning
- Lake Wind Advisory
- Wind Advisory
- Extreme Fire Danger
- Special Weather Statement
- Marine Weather Statement
- Air Quality Alert
- Hazardous Weather Outlook

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:

A total of 59 local Emergency Proclamations have been received to date from city, county, and tribal governments, as well as special districts:

- 25 Counties: Butte, Colusa, Calaveras, El Dorado, Fresno, Glenn, Inyo, Kern, Kings, Madera, Mariposa, Merced, Modoc, Plumas, San Bernardino, San Joaquin, San Luis Obispo, Santa Barbara, Shasta, Siskiyou, Stanislaus, Sutter, Trinity, Tulare, Tuolumne, and Yuba.
- 12 Cities: City of Live Oak (Sutter County), City of Lodi (San Joaquin County), City of Manteca (San Joaquin County), City of Montague (Siskiyou County), City of Porterville (Tulare County), City of Portola (Plumas County), City of Ripon (San Joaquin County), City of Santa Barbara (Santa Barbara County), City of Rancho Cucamonga (San Bernardino County) and City of West Sacramento (Yolo County), City of Willits (Mendocino County), and City of Fort Bragg (Mendocino County).
- 10 Tribes: Cortina Indian Rancheria (Colusa County), Hoopa Valley Tribe (Humboldt County), Karuk Tribe (Siskiyou/Humboldt Counties), Kashia Band of Pomo Indians of the Stewarts Point Rancheria (Sonoma County), Picayune Rancheria of Chukchansi Indians (Madera County) Sherwood Valley Pomo Indian Tribe (Mendocino County), Tolowa Dee-ni' Nation (Del Norte), Tule River Indian Tribe (Tulare County), Yocha Dehe Wintun Nation (Yolo County), and Yurok Tribe (Humboldt County).
- 12 Special Districts: Carpinteria Valley Water District (Santa Barbara County), Goleta Water District (Santa Barbara County), Groveland Community Services District (Tuolumne County), Lake Don Pedro Community Services District (Mariposa Stanislaus County), Mariposa Public Utility District (Mariposa County), Meiners Oaks Water District (Ventura County), Montecito Water District (Santa Barbara County), Mountain House Community Service District (San Joaquin County), Nevada Irrigation District (Nevada County), Placer County Water Agency (Placer County), Tuolumne Utilities District (Tuolumne County), and Twain Harte Community Services District (Tuolumne County).

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
